

## The Universe revolves around you!

"The universe doesn't revolve around you". This is what you hear people say to others when they find them to egocentric or to ambitious. Maybe this is indeed the case in earth reality, where things don't always go your way but this is certainly not the case in the divine reality.

The Universe does revolve around you! And around every soul/being on this earth and other universes of universes. On our daily level we may not be able to notice this, but small events which some might call "coincidences" may be the tell tale signs.

Once you discover the inner workings of the laws of the Universe, you will find this story not be as strange after all. Everything in our Universe has been carefully designed. From the littlest of organism to the biggest of mammal. Everything has its place and function. Also the events which form a persons life. When we take a closer look at a human life, the same story applies. There is a plan for every being and this plan is designed together with that being. Events are entwined with each other and are being carefully directed with us consciously playing our roles. Although our ego-self isn't aware of this game behind the scenes. It may be time for people to realize on a greater scale that the time has come to acknowledge that we are neither our egos or our bodies. That we are more than that.
